Painters

The Painter must prepare and paint buildings inside and outside. A Painter paints for decorative and protective purposes. The Painter must be aware of the

danger of physical and health hazards. He must follow and obey all health and safety rules.

A Painter must be skilled in handling brushes and other painting tools in order to apply paint thoroughly, uniformly, and rapidly to any type of surface. A Painter must also know the characteristics of common types of paints and finishes from the standpoint of durability, suitability for different purposes, and ease of handling and application.

Painters must know how to erect scaffolding winches, including swing stages' (scaffolds are suspended by ropes or cables attached to roof hooks). Working on tall buildings and other structures, painters often use them.

Painters use spray guns to paint surfaces or objects that are difficult to paint with a brush such as lattices, cinder, concrete blocks, and radiators. They also use spray guns for large areas that can be sprayed with a minimum preparation period. When using a roller (a rotating applicator covered with soft material), the Painter rolls the applicator over any surface to be covered.

As for Paperhangers they must know how to paper walls and hang all types of wall fabrics and wall coverings as well.

Drywall Finishers bed and finish sheet rock to a smooth finish for painting on wall fabrics. They must know how to repair drywall and texture ceilings and walls as well.

- 1) *What are the main purposes for a painter?*
- 2) *How must the painter apply paint?*
